Sun Shading Solutions Nice

# Son Radio transmitters

Convenient control of  
privacy and sun protection

**Living comfort –  
only one push  
of a button  
away**

# The right radio transmitter everywhere

Consistent, modern design, ergonomic use and many clever functions – all this are the hallmarks of Son radio controls. With a simply press a button to move roller shutters, blinds, awnings, lighting blinds, awnings, lighting etc. easily and conveniently – even from the comfort of your couch.

A mini transmitter for your pocket, a hand-held radio transmitter for the sideboard and wall-mounted transmitters for on-site operation. Control the motorized sun protection and according to your personal preferences and choose the type of transmitter that suits your living situation and your preferences the best.

# Son series for every application

# Design meets ergonomics

Experience a modern and minimalist design that runs through our entire range of of Son hand-held and wall-mounted transmitters.

For a personal touch and a harmonious living Son transmitters are available in two different color variants.

Large buttons and a slider function make use easier and at the same time ensure ergonomic handling.

The LED  
status  
display  
visualizes  
reliably  
every  
operating  
action

The channel  
selection  
buttons  
can be  
individually  
assigned

Large  
buttons  
provide  
for a  
simple  
use

## Reliable Function? With certainty

You can rely on the secure transmission of your commands on the Son transmitter series. Thanks to the bidirectional radio technology and a genuine routing function, signals are reliably transmitted, processed and forwarded. The LED display of the transmitter shows that an use has been carried out. If you are not within sight this is particularly practical. So you can be sure, for example, that all shutters on the ground floor have been closed.

Depending on the version, the transmitters have 1 to 15 channels and a slider with which the light can be conveniently dimmed continuously. At the same time the slider enables simple control, e.g. for slats for blinds (depending on model).

**Always  
ready  
to hand**

A photograph of a Son transmitter device, a small silver rectangular remote control, resting on a light-colored wooden table. In the background, there is a stack of books, one with a green cover, and a white cup of coffee on a silver saucer. The scene is lit with warm, natural light, suggesting an indoor setting like a cafe or a home office.

**Son transmitters not only make everyday life easier – The radio system is characterized by maximum flexibility. You have the option of use roller shutters, blinds, etc. individually or several applications, e.g. in one room, turn into a group. Central use is also possible. All of this can be reprogrammed at any time – a radio system is ideally suited for both new build and modernization.**

# Clever functions make your everyday life easier

Technical innovation and simple use – the Son series makes it possible! Practical functions, such as multi-channel selection and the integrated NFC technology allow you to control according to your individual needs.

## Channel selection

Depending on the version the transmitters have **1 to 15 channels**.

## Slider function

For **stepless dimming** of light and controlling the blinds during slow movement, e.g. for **slat turning** for blinds (depending on model).

## Operating mode

### Manual/automatic mode:

In combination with automatic devices shutters and sun protection move depending on time or sun protection commands. **This function can be activated or deactivated on the transmitter.**

## NFC technology

Allows convenient programming via a **mobile device**.

## Astro function

The Astro function can be used to **individual, time-controlled commands** can be triggered **automatically**.

## Ergonomics

The **large, raised buttons** ensure that the transmitters are very easy to can be used very easily. The channel selection buttons light up during operation or group creation (e.g. with VarioSon-868 Slide).

The table on page 11 shows which features your desired model offers.

Small but mighty – even in the shell mini transmitters cut a fine figure. They are super compact and thanks to the wall bracket always where they are needed.

Practical and solid – the hand-held radio transmitters are supplied with a wall bracket, but thanks to the wide surface area, they can also be set up.

All Son wall-mounted transmitters consist of the control unit, a standardized frame and and a mounting bracket for wall mounting.

# elero Sun Shading Solutions

elero specializes in comprehensive, innovative and high-quality solutions in the field of privacy and sun protection. With over 60 years of experience in the automation of sun shading systems the company is your reliable partner for quality products made in Germany.

# A world without barriers

**We are convinced that intelligent and comprehensive control of sun shading systems contributes to increased well-being and living comfort. That is why we offer high-quality drive and control solutions for building automation and are constantly optimizing our products continuously.**

Quality of life, security, living comfort and energy efficiency – these are at the heart of everything we do. Because automated shutters, screens, blinds and awnings do much more than just darken rooms. They offer reliable protection from the sun, from prying eyes and round off the appearance of the building. Heating costs are reduced in winter, while in the warmer months season, the temperatures in the rooms remain pleasant – the cooling load is reduced. All of these factors help to save energy and improve living and working comfort.

100%

**Innovation  
Quality  
Partnership**

# We make even the smallest of gestures extraordinary

## Nice – a world without barriers.

Nice S.p.A. is a manufacturer of systems for drives and controls of gates and garage doors, awnings, interior shading, roller shutters and alarm systems for every application – from private homes to large public buildings. The “Sun Shading Solutions Nice” division is based at both locations: at the Nice headquarters in Oderzo, Italy, and at elero in Schlierbach. With the elero's many years of expertise in the field of sun shading and Nice's strength as a global player, the division is ideally positioned worldwide.
